

MULTI TUBE VORTEX MIXER

Experience the ease and precision of mixing with
power packed performance

Microprocessor Control	The variable speed microprocessor control provides consistent uniform mixing action.
LCD display	Touch pad controls with easy-to-read, independent LCD displays for speed and time allow the operator to view both settings at once. Provides repeatable and accurate results every time and is easily visible across lab benches. Timer will display elapsed time or, when programmed to user defined limit, will shut off the unit when time reaches zero. Display will show last used settings, even after power has been turned off.
Pulsing Mode	Programmable pulsing mode allows the user to adjust the pulse-on and pulse-off times between 1 minute to 5 minutes intervals. This feature enhances the vortex action by creating a more vigorous mix.

- Upto 60 Tubes can be mixed simultaneously.
- Up to 2200 rpm, a true vortex in every tube.
- Assortment of accessories for a variety of tubes, flasks & plates
- Pulsing program for interval mixing
- USB Port to Integrate LabQuest Data Logger
- User Programmable ramp setting
- Can be used for suspensions, high throughput testing in clinical, environmental and chemistry labs
