

Weighing scoop

Designed for accurate transfer

Made from 3.3 Low Expansion Borosilicate Glass

Our weighing scoops are designed to offer precise, contamination-free transfer of powders & granules directly to your balance. With smooth surfaces for easy cleaning & ergonomic shapes for comfortable use, they are an essential tool for any laboratory or production setup.

What are Weighing Scoop used for?

Borosil Scientific's weighing scoops are primarily used when small quantities of powder, liquid or semi-solid material need to be weighed. The powder can be introduced into the received vessel through the tabular stem.

Weighing Scoop have open tabular arm.
Ideal for weighing small quantities dyes & powders
